The Ask

THE ASK

Food Network EDS Migration POV

Scope & deliverables overview — the recipe experience patterns this EDS build is proving for Food Network.

01

Recipe Detail

DYNAMIC · JSON

Recipe detail pages driven by live Food Network JSON — title, rating, ingredients, directions, and related metadata.

02

Recipe Info & Body

AUTHORED FIRST

Cook times, yield, ingredients, and steps fill automatically when empty — authored content always takes priority.

03

Recipe Suggestions

LIVE FILTERS

Quick & Easy, Highly Rated, Healthy, and Surprise Me filters surface related recipes from live Food Network data.

04

Video Playlist

FN PLAYBACK

Featured player and playlist rail with inline Food Network video streaming, plus YouTube and Vimeo support.

05

Recipe Page Chrome

ACTIONS · REVIEWS · NOTES

Save, share, print, meal plan, reviews, and private notes — the full detail-page tools readers expect.

06

Header & Footer

STATIC · DA NAV

Site chrome migrated to match foodnetwork.com — navigation flyouts, utilities, and the dark production footer.

07

Home & Commerce

EDITORIAL · SHOP · NL

Homepage and listing experiences, plus shop product cards and newsletter signup wired to Food Network.

08

Brand System

TOKENS & TYPE

Franklin Gothic typography, brand color tokens, and rating patterns aligned to the live Food Network site.

02

Scope & Status

SCOPE & STATUS

Where the build stands today

Live on **main--foodnetwork--adobedrago.aem.page** — ready to walk through the latest recipe and chrome work.

01 **Recipe path resolution**
Any Food Network recipe slug resolves cleanly, with optional authored metadata to point a page at a specific recipe.

02 **Authored content first**
Authors stay in control — live JSON fills only what's left blank, so authored copy and structure always win.

03 **Star ratings**
Recipe titles show a Food Network–style star meter with review count, rounded the same way as the live site.

04 **Suggestion filters**
Live Quick & Easy, Highly Rated, Healthy, and Surprise Me filters on recipe detail pages.

05 **Recipe page tools**
Save/share actions, reviews, private notes, newsletter signup, and shop cards complete the detail experience.

06 **Video & recipe body**
Inline Food Network video playback, polished ingredients/directions layout, and accessibility fixes.

07 **Header, footer & brand**
Production-matching nav and footer, Franklin Gothic type, and Food Network color tokens.

08 **Home & listings**
Editorial homepage and recipe category/listing pages published alongside the detail demos.

03

Live Demo

LIVE DEMO

Header, Footer & Brand Chrome

Successful migration of Food Network site chrome to Edge Delivery Services (EDS).

- Header matches foodnetwork.com — logo, primary nav, search, Saves, Shopping List, and profile utilities.
- Nav content and imagery authored in Document Authoring, with local SVG fallbacks when assets fail.
- Desktop hover flyouts with delayed close; TV schedule rows recognized in mega-menu groups.
- Mobile hamburger drops below the bar; recent accessibility and best-practice fixes applied.
- Dark footer + Franklin Gothic URW type family wired through brand tokens.

SAMPLE SURFACES

https://main--foodnetwork--adobedrago.aem.page/

https://main--foodnetwork--adobedrago.aem.page/recipes

https://main--foodnetwork--adobedrago.aem.page/recipes/breakfast

Authoring model

- Nav/footer fragments published via DA
- Brand tokens: accent #f63, teal #5ac0b8
- Type: Franklin Gothic URW Cond / Book / Med
- UE component models for blocks

LIVE DEMO

Recipe Detail Pages

Migrated recipe detail pattern — dynamic JSON fill with authored content taking priority.

- Recipe path from URL or authored `recipe` metadata; slugs with or without `-recipe-` both resolve.
- One fetch of `.sni.json` powers title, rating stars, author, ingredients, directions, categories, package, show/episode.
- Empty info/body blocks fill from JSON; authored copy always wins. Watch-promo shells no longer block fill.
- JSON-built headings use “Ingredients:” / “Directions:”; authored headings render exactly as written.
- Nutrition Info stays authored in a popover; one-step recipes and empty ingredient columns get source-like layout.

SAMPLE MIGRATED RECIPE PAGES

https://main--foodnetwork--adobedrago.aem.page/recipes/alton-brown/french-toast-recipe-1942216

https://main--foodnetwork--adobedrago.aem.page/recipes/food-network-kitchen/candy-corn-waffles-3852440

https://main--foodnetwork--adobedrago.aem.page/recipes/winner-aarti-sequeira1/baked-samosas-with-mint-chutney-recipe-1952533

https://main--foodnetwork--adobedrago.aem.page/recipes/demo-recipe-page

Dynamic recipe architecture

- Source: foodnetwork.com `.sni.json`
- Shared module: `scripts/recipe-data.js`
- Path: `/recipes/...(-recipe)?-<id>`
- Blocks: `columns-recipe-info`, `columns-recipe-body`
- Images via food.fnr.sndimg.com
- Authored content always wins

LIVE DEMO

Suggestions, Video & Recipe Chrome

Related-recipe discovery, Food Network playback, and the companion blocks that complete a detail page.

Live suggestion filters

Quick & Easy | Highly Rated | Healthy | Surprise Me

- Authored cards remain the default “Looking for Something Else?” rail.
- Filters load live payloads only when `columns-recipe-body` is on the page.
- Detail cards show bare review counts; hub/category grids show “N Reviews.”

Video playlist

- Featured player with optional vertical rail.
- FN recipe assets resolve and play inline via HLS.

Companion blocks

recipe-actions
Save, Pinterest, Print, Email, Add to Meal Plan — share URLs use the canonical FN recipe path.

reviews
Star meters, paginated list, and compose form labels authors can override.

private-notes
Local notes keyed to the recipe path (or page path in preview).

newsletter · cards-shop
Email signup to FN + “Tools You May Need” shop grid with outbound product links.

What to click in the demo

- Open Candy Corn Waffles (path without `-recipe-`)
- Toggle Nutrition Info · switch suggestion filters
- Try Save / Print / private notes / reviews
- Play the recipe video rail
